

Reinventing the beautiful game

Linemark Global brings innovation to the linemarking of sports fields, blending award-winning quality, total convenience and cost effectiveness.

Revolutionary advances offered by our Impact system enable the marking out of an entire football pitch from just one litre of ready-to-use paint. This achievement has been recognised with The Queen's Award for Enterprise: Innovation – the highest official accolade available to a British company.

We are now the partners of choice for the majority of the English Premier League and many of the clubs in the German Bundesliga and the Spanish La Liga and would be pleased to provide references.

Our systems are not only used for football – also hockey, rugby, tennis and athletics to name a few. Our products were widely deployed at the London Olympics and it was our paint that marked out the pitch for the 2015 Champions League final at the Olympiastadion in Berlin.

Machines

High performance paints producing long-lasting, high definition lines are only part of the story. Linemark Global also offers a full range of equipment designed to meet the requirements of a small club with one or two pitches up to complexes hosting fifty or more sports fields.

Consistent with our ethos, all our machines have simplicity at their heart, designed with the user in mind.

IGO MINI

The **IGO MINI** is a highly convenient solution for an institution with a small number of pitches. It features a "plug and spray" system for quick and easy connection to Impact paints. Lightweight and compact in size, it generates a consistently high quality line.

IGO DE LUXE

The **IGO DE LUXE** is the perfect solution for typical medium to high volume users. It features a long-life rechargeable battery, a solenoid valve for instant paint cut-off and a disc-lift mechanism for ease of operation.

IGO RIDE-ON

For high volume users with a utility vehicle, the **IGO RIDE-ON** is frequently selected enabling the highly efficient marking of multiple pitches. It features a retractable arm for ease of operation and a ski design allowing the spray head to skim over uneven surfaces.

“Linemarking is carried out across the complex using the Impact System. It’s fast and the lines last longer.”

Alan Ferguson,
Grounds & Estate Manager,
St. Georges Park
(England national team training ground).

Paint

Natural Grass

All our paints are ready-to-use resulting in a huge saving in time (set-up, re-fills and clear up) when compared with dilutable paints.

All the paints featured below offer the same incredibly high yield - from just 1 litre of paint per football pitch - and are available in a variety of colours.

Synthetic Grass and Hard Surface Applications

In addition to natural grass, we have also brought innovation to ready-to-use paints for synthetic grass and hard surface applications. These are available in the full range of colours and are formulated to either be permanent or removable.

IMPACT

IMPACT is a general purpose ready-to-use linemarking paint producing quality sports field markings.

IMPACT XP

IMPACT XP is a Queen’s Award winning ready-to-use linemarking paint, producing high quality sports field markings. It is engineered to be whiter, brighter and longer lasting than paints requiring dilution.

IMPACT i-LINE

IMPACT i-LINE is a very recent development and is the ultimate choice where the quality of the line is the primary consideration. It utilises optical brighteners resulting in enhanced reflectiveness on the grass and improved durability.

Linemark Global

brings you high quality, convenient and cost effective linemarking solutions. We exclusively offer ready-to-use paint solutions to our clients bringing significant savings in time and effort. In labour costs alone our customers save an average of 15 minutes of productive time per football field when compared with paints requiring dilution.

“Our lines are marked out with Impact XP paint. It provides very bright white lines that last even after periods of heavy rainfall. Also the paint does not ‘shadow’ and produces a very professional finish.”

Keith Kent,
Head Groundsman at Twickenham Stadium (the national stadium for English rugby).

Put us to the test ...we're always pleased to show how we lead the way when it comes to quality and convenience at an attractive price.
